

# Group Presentation

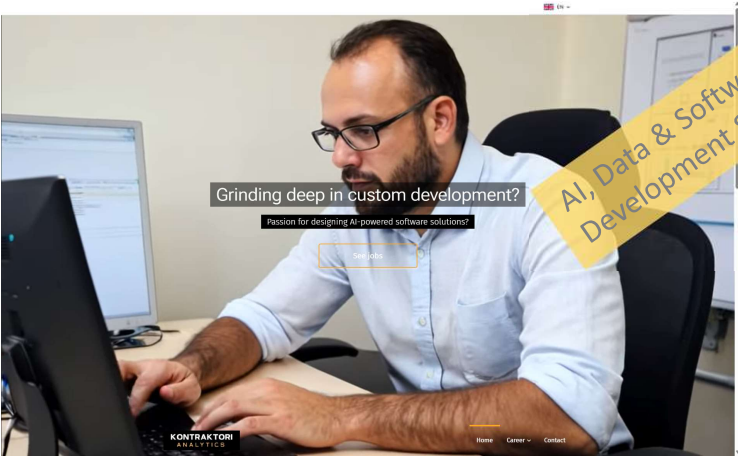

TALENT CATALOG as career promotion platform

Kontraktori Group Oy (Talent Catalog)  
Atsalea Software Oy (Osaajaporssi)

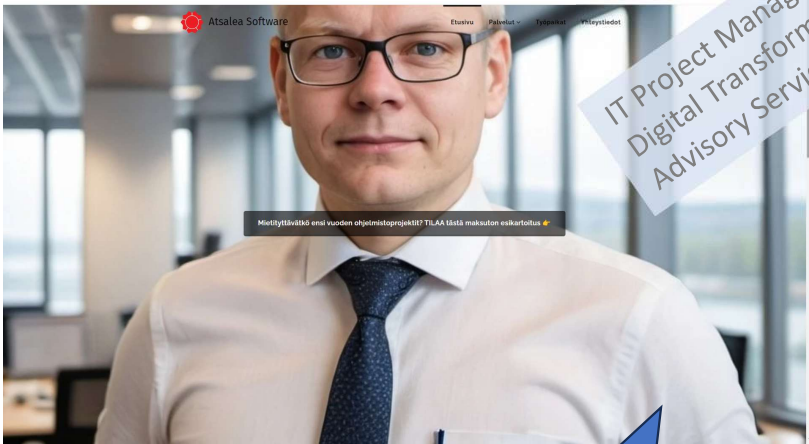

# Loose group structure in the background

" Experts work side by side with clients, while we as an employer take responsibility for supporting, developing and advancing individual careers."

Kontraktori Group parent company

Atsalea Software subsidiary

"We offer expert work resourcing services to corporations"

Operating model is very similar

"We offer expert work resourcing services to corporations and advisory services to SME sector"

## TALENT CATALOG

brings a *career advancement promotion platform* dated to the 20th century for software professionals

Today's decision-makers are even more selective and cautious with their time. They may often ask themselves: "Is it worth interviewing this candidate based on the material received for an open position?"

The Talent Catalog is a curated collection of professional presentation pages designed to provide a comprehensive view of individual expertise. Its purpose is to support business decision-makers by offering clear, well-structured insights into each professional profile at the key moment of selection.

As a promotion platform the Talent Catalog forms the basis of company direct sales and marketing operations, which is carried out on regular basis through a newsletter aimed at different user groups and by sharing individual profile pages (URLs) in one-on-one situations with the decision-makers.

TO DEMYSTIFY  
TECHNOLOGY  
FOR BUSINESSES  
OF ALL SIZES

  
Jari H.  
AI/ML Engineer, FI-Helsinki

Last update: 2025-09-24

I'm a passionate programmer working in Machine learning. I've been actively involved in building and deploying AI-driven solutions, combining software development expertise with data science to create impactful products. My work spans the entire lifecycle, from research to production-ready software, with a strong focus on finding insights from the data.

Key areas I've worked on include:

1. #Forecasting and #Analytics: Developing and refining models to predict trends and improve decision-making in areas like understanding customer segments, lifecycle, and purchasing trends(including forecasting).

2. #Generative AI: Leveraging AWS Bedrock and Retrieval-Augmented Generation (RAG) for creating intelligent, context-aware agents that can help with understanding patterns in the data such as Customer Behaviour.

3. Scalable Solutions: Using #AWS CDK and cloud-native architectures to design scalable, reliable systems for data-driven applications.

Asking price: 88 €/h

## THE TALENT CATALOG — PRIVACY PROTECTION POLICY

### Profile presentation format

- The ID-identifier of an individual profile is formed by the equation first name & first letter of last name, such as Jari V
- Contact information has been removed from the CV/Resume view

Inclusion to the Talent Catalog requires individual permission, which can be granted either for sales purposes only or for sales and marketing purposes.

### Sales

- A single profile page is shared in 121 sales situations as a replacement for a CV attachment
- A single profile page thumbnail does not appear in the aggregation site view.

### Marketing

- A single profile page thumbnail appears in the aggregation site view.
- As a monthly lift in the Newsletter, the profile page must include a video presentation.
  - ✓ The distribution list of companies is verified with the lifted profile owner in advance to prevent any imaginary conflict.

The Talent Catalog is not publicly visible in the directory tree of kontraktori.fi

Last update: 2025-09-24

I'm a passionate programmer working on AI/ML projects and deploying AI-driven solutions, combining data science to create impactful products. My work spans across various software, with a strong focus on finding innovative solutions.

Key areas I've worked on include:

1. #Forecasting and #Analytics: Developing and deploying AI-driven solutions, combining data science to create impactful products. My work spans across various software, with a strong focus on finding innovative solutions.

2. #Generative AI: Leveraging AWS Bedrock and Retrieval-Augmented Generation (RAG) for creating intelligent, context-aware agents that can help with understanding customer behavior and purchasing trends(including forecasting).

3. Scalable Solutions: Using #AWS CDK and cloud-native architectures to design scalable, reliable systems for data-driven applications.

Asking price: 88 €/h
